

Spectacle Frame Endurance Tester

Introduction

The Spectacle Frame Endurance Tester has a certain fatigue resistance, ensuring that the frame can be safely worn for 2 years or more, and the frame can be resisted from normal loss.

Parameters

1. Rotating speed: 40 /min
2. Number of measurement times: 0~999999 times
3. Power supply: AC220V 50Hz
4. Size: 35 x 42 x 25 CM (L * W * H)
5. Weight: 16 Kg

Standards

EN1836, ISO12870, GB/T14214-2003, etc.

Installation Notes

1. Test environment: temperature 23 ± 2 ° C, relative humidity $60 \pm 2\%$.
2. Place the instrument on a relatively flat test platform.
3. Power connection: AC220V, 50Hz, 5A.
